Ram

Muslim Book 6 Hadith 2381

Abu Huraira (Allah be pleased with him) narrated that the messenger of Allah (may peace be upon him) made a mention of the new moon and (in this connection) said: Observe fast when you see it (the new moon) and break fast when you see it (the new moon of Shawwal), but when (the actual position of the month is) concealed from you (on account of cloudy sky), then count thirty days.

ad an

Dawud Book 13 Hadith 2319

NARRATED Hudhayfah:

THE PROPHET (PEACE BE UPON HIM) SAID: DO NOT FAST (FOR RAMADAN) BEFORE THE COMING OF THE MONTH UNTIL YOU SIGHT THE MOON OR COMPLETE THE NUMBER (OF THIRTY DAYS); THEN FAST UNTIL YOU SIGHT THE MOON OR COMPLETE THE NUMBER (OF THIRTY DAYS).

Waning is when
there is a decrease
in the lit area of
the moon

10

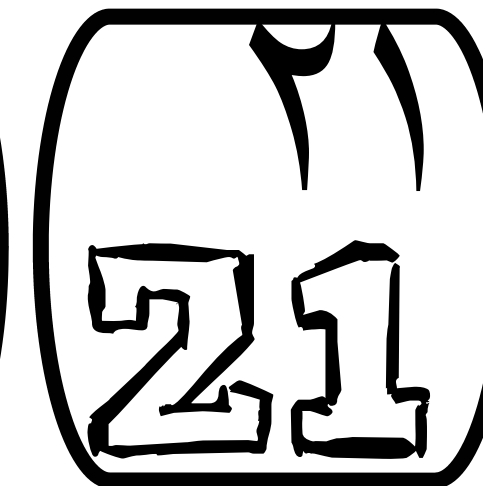

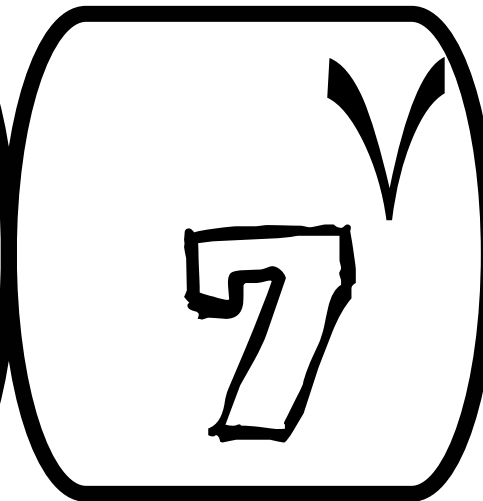

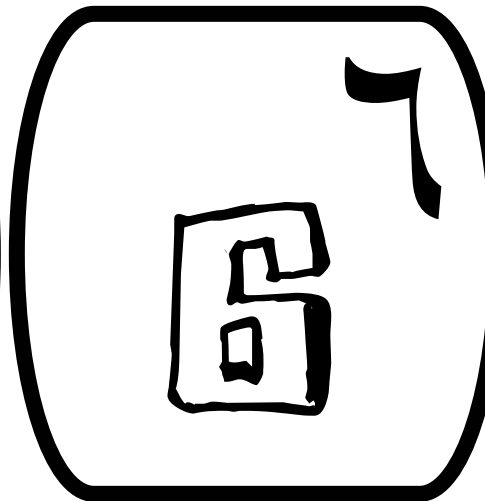

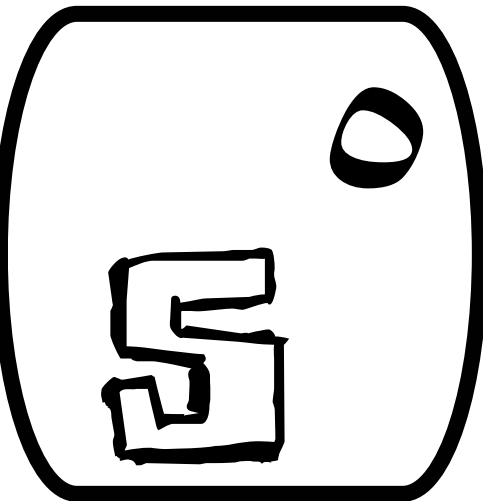

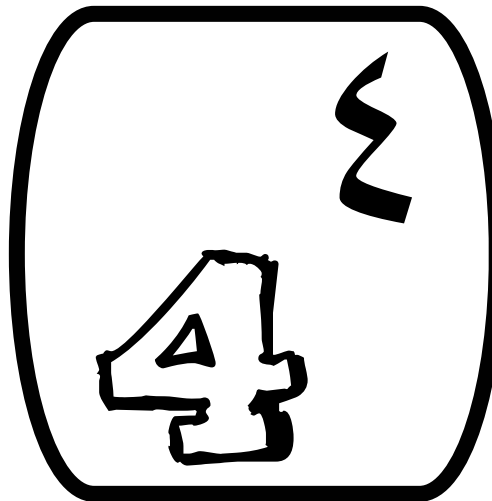

11

The Moon is
about 250,000
miles from
Earth.

23

24

25

29

The Moon takes about 27 days to go all the way around the Earth and return to its starting position

The Moon is not a light source, it does not make its own light

The Moon travels around the Earth in a circle called an orbit

Waxing is when there is an increase in the lit area of the moon

We can see the Moon because light from the Sun bounces off it back to the Earth

26

27

28

A lunar month
is about 29.5
days

30

If you traveled
to the moon by
car it would take
130 days

The surface of the
Moon has about the
same area as the
continent of Africa

The new moon rises
and sets at
approximately the
same time as the sun.

The Moon appears to change
shape but what we are
actually seeing is the Moon
lit up by the light from
the sun in different ways
on different days.

Countries near the
equator see the
crescent moon
shaped like a smile
